## S A M (Speed Alert Mobile)

### AD300

#### Transportable Radar Speed Display

The AD300 TRSD provides motorists with a direct indication of their vehicle's speed. The AD300 is effective in reducing motorist speeds approaching road works or other temporary speed restricted areas.

Easily transportable, fully programmable, low maintenance and with a long life cycle, AD300's are ideally suited to large and small governmental and private organisations alike.

Powering the AD300's couldn't be easier with both powerful solar recharging for continuous field use, and integrated mains recharging for depot use.

Rapid deployment is easy with a gas-assist strut providing assistance to lift the display screen up into position, providing motorists with an unobstructed view of your message.

A jockey wheel and four fold down stabiliser legs [with removable handles] make positioning the AD300 a safe and simple operation for single operators.

### FEATURES

- Ultra-Bright LED Display (Wide Viewing Angle)
- Integrated Radar Speed Sensor
- Solar Power for Continuous In-Field Use
- Low Maintenance
- Weatherproof & Vandal Resistant Display
- Removable Draw (Tow) Bar
- Complies with AS 4177
- Display is Locked Down for Safe & Easy Transportation
- Four Permanently Secured Fold-up Stabiliser Legs
- Data Logger for Traffic Analysis - stores up to 255 User Programmed Message Schemes
- Road and Speed Sign Display Area for Standard Road Signs

### OPTIONS

- Wireless Communication (via 3G / GSM)
- Klamp-it® Security Wheel Locks
- Tamper / Vandal Alarm (or via 3G / GSM / CDMA)
- Camera – HiSpeed to Capture Vehicles Exceeding Limit
- GPS Positional Information (also Updates Time Clock)
